

# 40 GREAT JENKINS PLUGINS IN 40 MINUTES

Miro Cupak (DNASTack)

 @mirocupak

2015-02-07

# WHO AM I?

- currently software engineer at DNAnstack
- contributor/administrator (~1 year) at Red Hat
- Jenkins user (~5 years)
- previously quality engineer at Red Hat

# JENKINS

- 638 organization members on GitHub
- 100K active installations with 300K nodes
- 3.2M installations of 1050 unique plugins

Which plugins should you use?

#1

# DASHBOARD VIEW

- view implementation containing portlets (well, sort of...)
- easy to extend

## Permalinks

## Embeddable Build Status Icon

Jenkins exposes the current status of your build as an image in a fixed URL. You can put this URL into other sites (such as GitHub README) so that people can see the current state of the build.

There are two URLs available for inclusion:

- **protected** exposes the badge to users having at least Read permission on the job
- **unprotected** exposes the badge to users having at least ViewStatus permission on the job

If you want the status icons to be public readable/accessible, just grant the ViewStatus permission globally to anonymous.

### Image

#### protected

```
http://ci.jenkins-ci.org/job/infra_update_center_v3/badge/icon
```

#### unprotected

```
http://ci.jenkins-ci.org/buildStatus/icon?job=infra_update_center_v3
```

### Markdown

#### protected

```
[![Build Status](http://ci.jenkins-ci.org/job/infra_update_center_v3/badge/icon)](http://ci.jenkins-ci.org/job/infra_update_center_v3)
```

#### unprotected

```
[![Build Status](http://ci.jenkins-ci.org/buildStatus/icon?job=infra_update_center_v3)](http://ci.jenkins-ci.org/job/infra_update_center_v3)
```

# WORKFLOW

- allows you to write complex workflows in Groovy with an embedded DSL
- forget **Build Flow** and **Join** plugins
- introduces a new *workflow* job type
- collection of plugins
- supports:
  - core job-related stuff (triggers, parameters, SCM...)
  - durable pipelines
  - allocation of slaves and workspaces
  - human input integrated into flows
  - sandboxing via **Script Security** plugin

**Workflow**

Definition

Groovy CPS DSL

Script

```
node('remote') {
    git url: 'https://github.com/jenkinsci/parallel-test-executor-plugin-
sample.git'
    archive 'pom.xml, src/'
}
def splits = splitTests([$class: 'CountDrivenParallelism', size: 2])
def branches = [:]
for (int i = 0; i < splits.size(); i++) {
    def exclusions = splits.get(i);
    branches["split${i}"] = {
        node('remote') {
            sh 'rm -rf *'
            unarchive mapping: ['pom.xml' : '.', 'src/' : '.']
            writeFile file: 'exclusions.txt', text: exclusions.join("\n")
            sh "${tool 'M3'}/bin/mvn -B -Dmaven.test.failure.ignore test"
            step([$class: 'JUnitResultArchiver', testResults: 'target/surefire-
reports/*.xml'])
        }
    }
}
parallel branches
```

- the lower the priority, the sooner the job runs

## Job Priorities

Assign Priorities by creating JobGroups. Priorities are assigned top down by first match. If a Job has a Priority assigned directly on the Job that Priority will be used and the below will not be used.

 JobGroup

Description

time-sensitive monitoring jobs

Apply to Jobs in View

All ▼

Priority

1 ▼

Run Exclusive (experimental) ☐

☒ Use a regular expression to only include a subset of the jobs in the view

Regular Expression

monitor.\*

☐ Use additional rules when assigning a priority to a Job

Delete

## Priority Sorter

Strategy

Weighted Fair Queuing ?

Absolute

Fair Queuing

Weighted Fair Queuing

resources than *higher* value.

Number of Priorities  ?

The Update will do a linear mapping from your current priorities to the selected range.

Default Priority  ?

Allow priorities directly on Jobs

☒

 ?

Check if you still want to have the ability to set priority directly on Jobs

Only Admins can edit Job Priorities

☒

Check if only Administrators should be allowed to view and edit the Job Priorities
