

UrbanEyes

Sheraz Khan, Miro Cupák, Ravi Kalyani

Researchers of cities use maps to
communicate important data

Sadly - mappable data is often unavailable

Sadder - few tools exist to collect that data

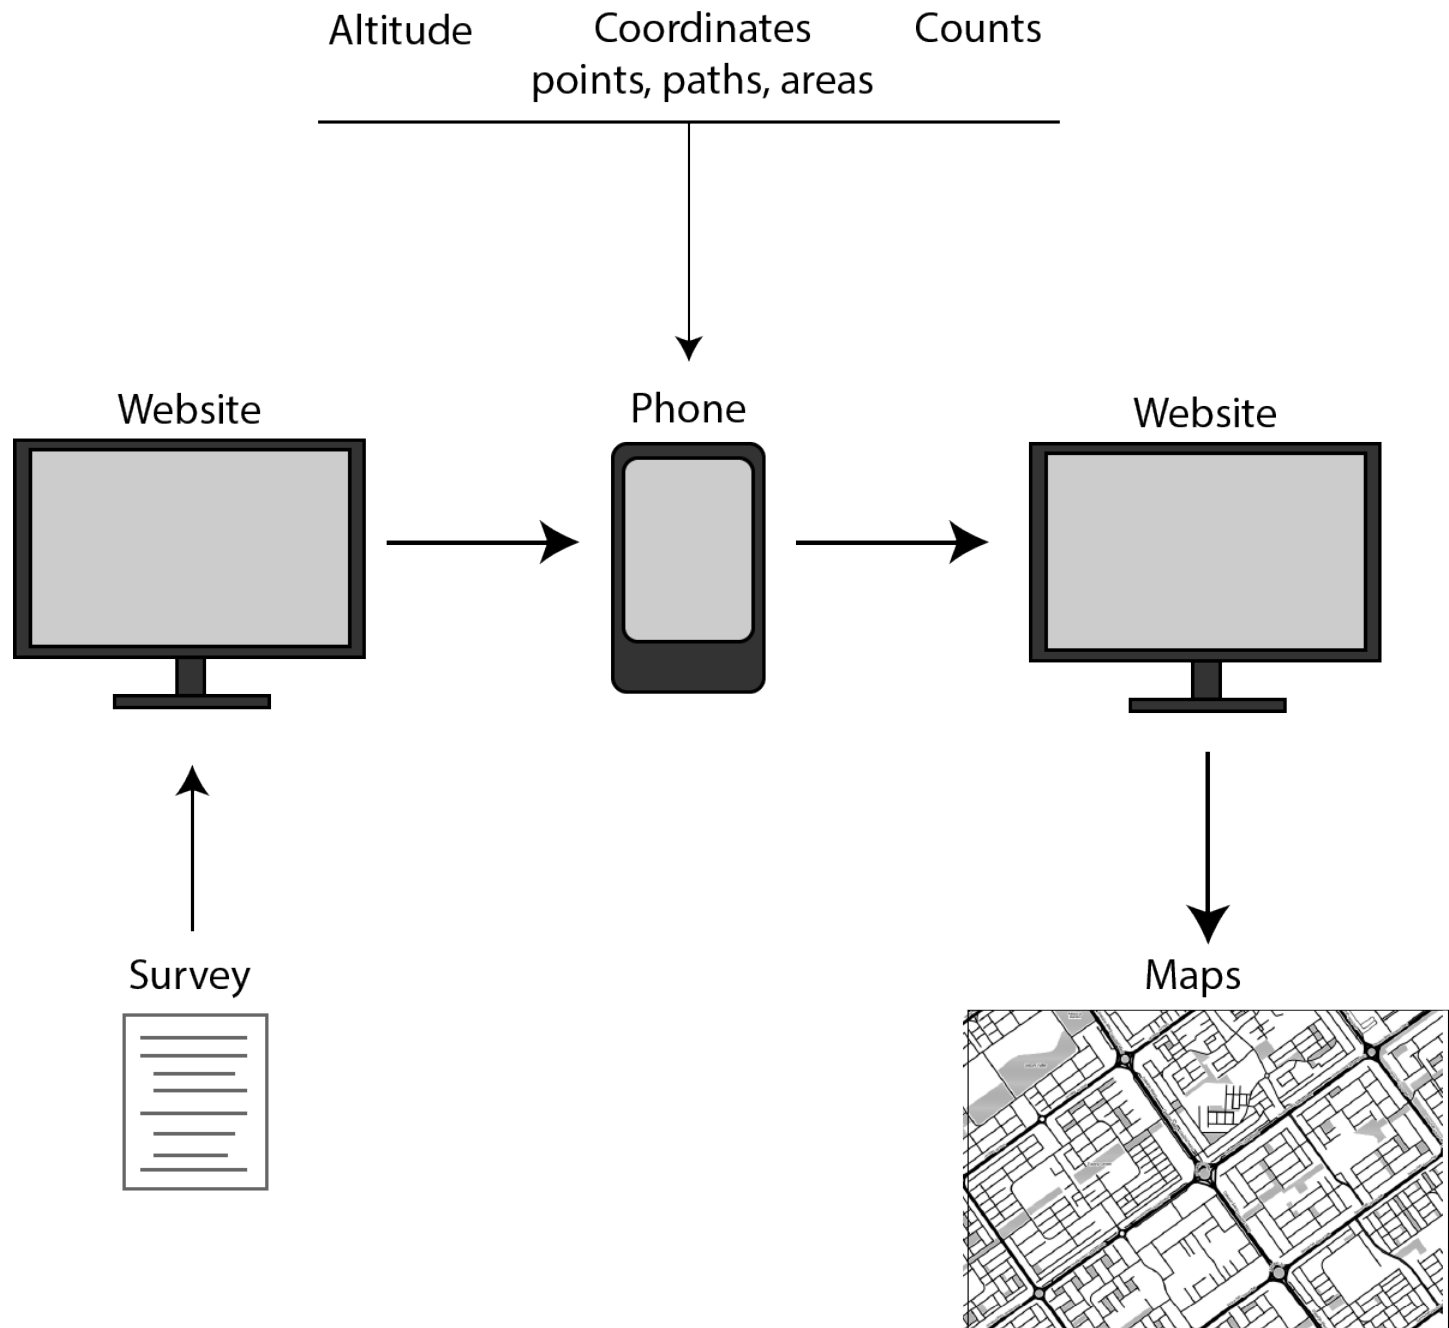

Saddest - tools are labourious to use

Enter: UrbanEyes

A tool for researchers of cities to collect the data they need for maps

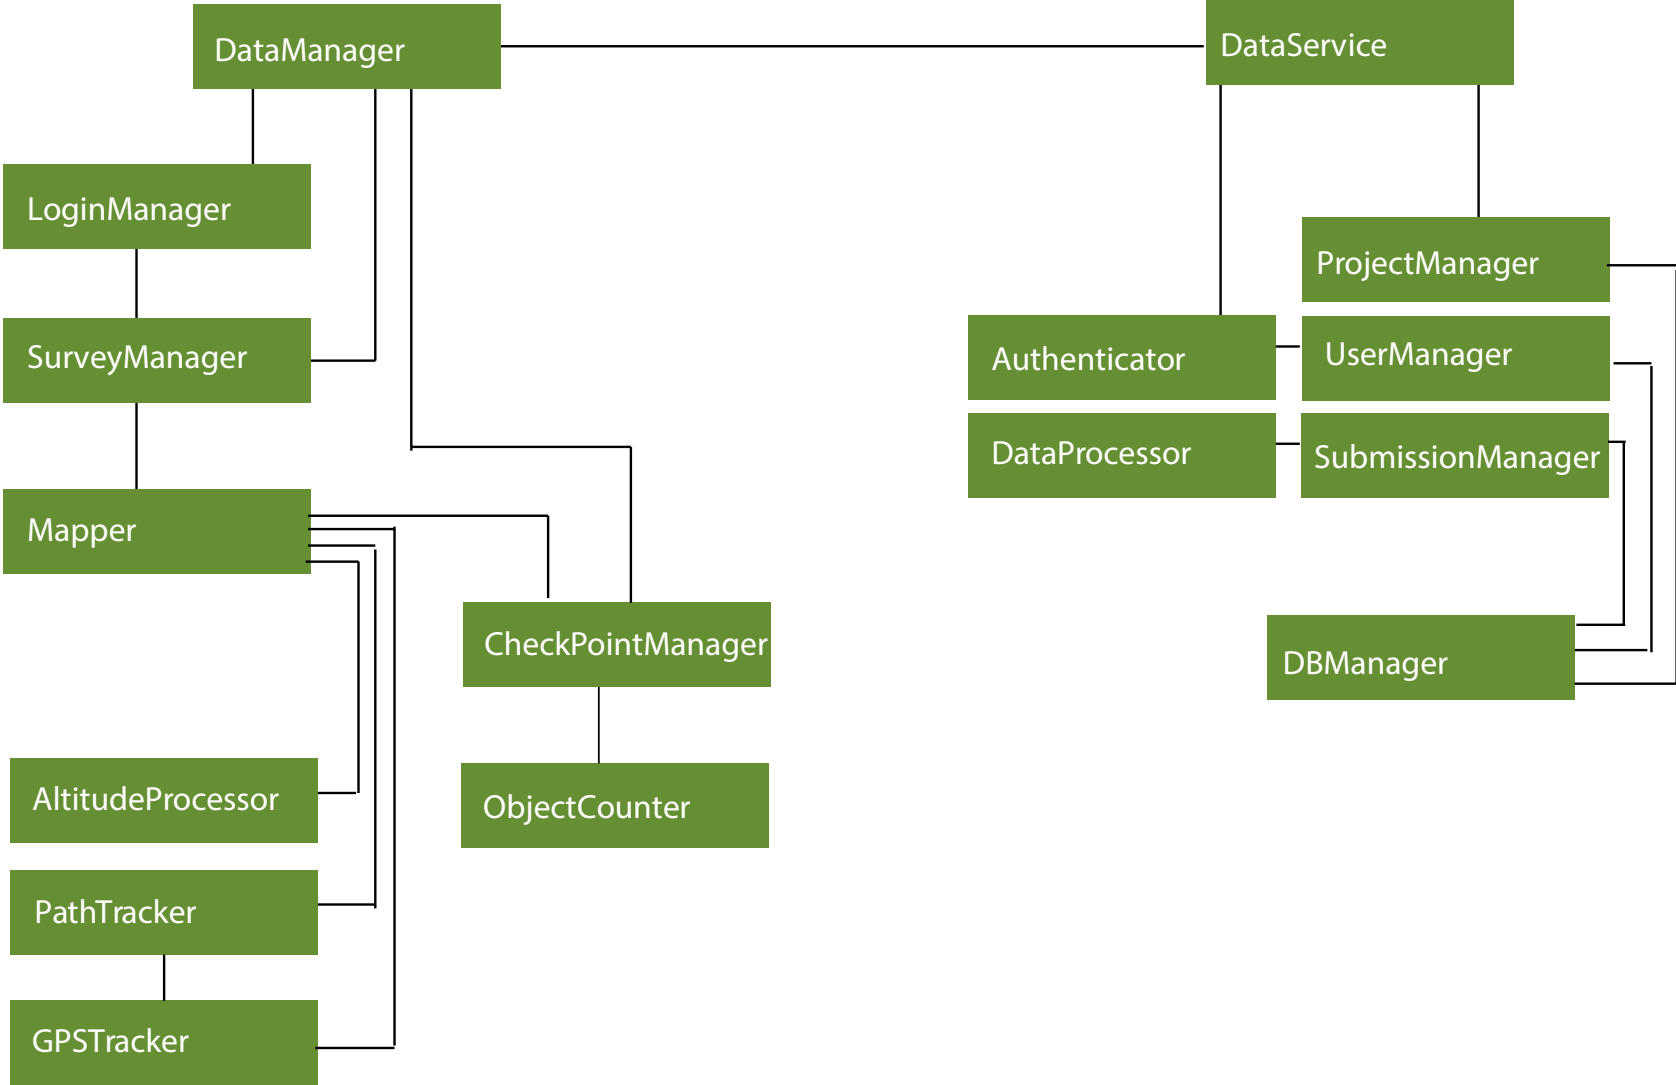

Uses convenient technology of the smartphone

Shares data through the web, ready to import

Mobile Application

Website

We could use UrbanEyes to...

...survey abandoned housing

...collect the locations and types of fruit trees in a city.

...find all accessible entrances to buildings along a street

Demonstration

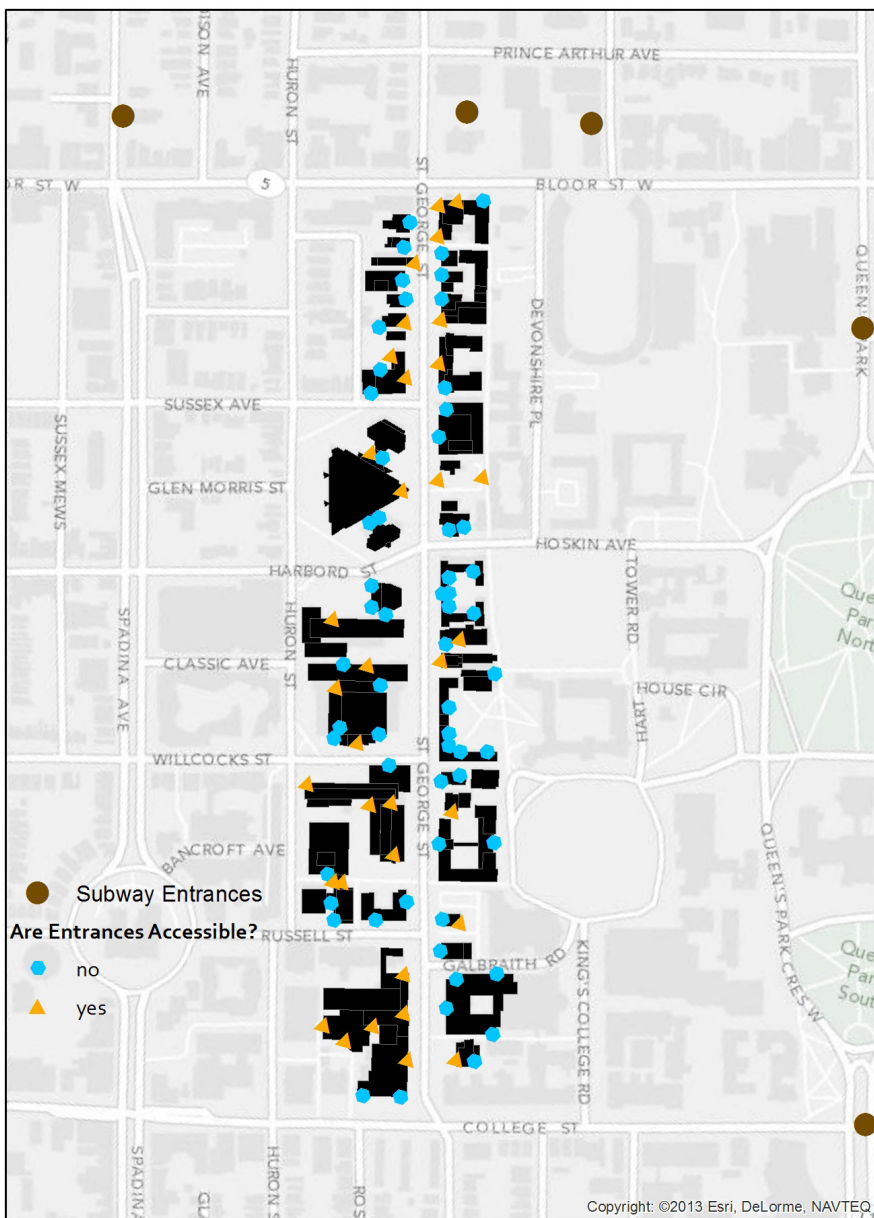

Data from UrbanEyes

```

Are Entrances Accessible?

- no
- ▲ yes

Map of this data

Distance Statistics to Closest Subway (m):

| | all entrances | accessible entrances |
|--------|------------------|-------------------------|
| Max | 863 | 968 |
| Min | 93 | 237 |
| Median | 556 | 611 |

A light gray background featuring a stylized map of a city street grid. The streets are represented by thin, light gray lines, with some thicker lines indicating major roads or highways. The grid is somewhat irregular, with various block sizes and street orientations.

What would be done differently?

Having clear example projects

Scraping the image counter from the beginning

Starting the web application earlier

Future Plans

Add noise measurement

Conversion of CSV data into Shapefiles

Uploading pre-set locations-to-survey

Questions?

Inaccessible Buildings

Whitney Hall
Galbraith (connected)
Knox College
Astronomy
Frat Buildings
School of Continuing Studies
Rotman (connected)
Office of Industrial Relations
Rotman Office
SGS Dean's Office
Physical Geography Building
Sir Daniel's Residence Hall

Number of Entrances:

Inaccessible: 59

Accessible: 35
