REPL: Java developer's new friend

Miro Cupak
Senior Software Engineer, DNAstack

22/03/2017

JShell

- interactive tool to execute Java and get immediate results
- JDK's Read-Eval-Print-Loop
- use cases:
  - learning
  - switching stacks
  - prototyping
  - investigating new APIs

More info

- /help
- API: import jdk.jshell.*
